

National Transportation Services – LTL, FTL, Specialized & Intermodal

Primary Logistics' domestic transportation programs cover virtually all trucking and related services coast to coast.

Whether you require local, regional or national LTL service or dedicated equipment, we have the established resources, service contracts, flexibility and time-definite programs at your disposal

We tailor distinct solutions to support your specific customer delivery commitments.

Because we are non-asset based and consistently move domestic freight all over the U.S., Canada and Mexico, Primary Logistics Services is not tied to asset or driver availability.

We maintain alliances with carefully selected LTL, FTL, Specialized and Intermodal partners assuring you equipment availability, flexibility and competitive pricing linked to time-definite door to door cycles.

Primary Logistics also offers air freight services based on specific airline and all-cargo service operator contracts. As your single source of contact, virtually all transportation service types and delivery profiles are available to you through our quality service-driven network.

Features and Benefits

Combined with our comprehensive 3PL services including fulfillment, pick and pack and other customer-driven value-added services, Primary Logistics offers:

- ✓ **Enhanced flexibility** – short-notice requests for equipment and drivers
- ✓ **Proven reliability** – documents track record
- ✓ **Immediate quotes** using our user-friendly TMS
- ✓ **Total control at your finger-tips** – our web-based system is linked to our carrier partners' own track & trace tools allowing you real-time shipment status
- ✓ **Your account appointed Customer Service Representative** is briefed, trained and kept up to date with your specific SOP, unique needs, expectations and objectives. A true extension to your own Customer Service and Logistics Services Teams.
- ✓ **Leverage our comprehensive capabilities** including drayage, warehousing, distribution and transportation services
